PROFILE

Backend-focused Software Engineer in the final year of a Computer Engineering degree. Highly experienced in designing scalable architectures, developing RESTful APIs, and implementing full-stack solutions using Node.js, Python, and React. Proven track record of bridging hardware-software integration for elite sports technology. Seeking to leverage my engineering background and technical problem-solving skills in a dynamic development team.

PROFESSIONAL EXPERIENCE

React Native Dev | Cloud Infrastructure | Backend Developer

Ivolution – Full day.

October, 2025.

- Develop mobile systems and tools with an emphasis on performance and scalability while maintaining an optimal balance between databases and cloud computing (React Native, Typescript, CouchDB, PouchDB, GCP).
- Development of web and desktop applications using React + Electron.
- Migrating microcontrollers processing system from Java to TypeScript
- I worked with my team to improve the software, taking full responsibility for receiving data via USB from peripherals controlled by microcontrollers for clients such as the AFA, CENARD, top-tier physical therapy centers, and elite clubs across all disciplines.

Support Administrator

Ivolution – Full time.

February, 2024.

- Provide technical support to customers regarding software and hardware resolving issues and answer technical questions.
- Provide feedback to the Development team.
- Test final products prior to their release.
- Manage inventory of products and materials.

- In this role, I proposed and developed a quality management system that covers the support area, the maintenance of incoming data, and its display on dashboards.

EDUCATION (PROFESSIONAL AND HS)

- **Computer Engineer**, National University of Rafaela. In progress. Started in 2022.
- **Bachelor of Science in Computer Science**, Instituto Cooperativo de Enseñanza Superior. Finished in 2021.

COMPLEMENTARY:

- SOLID principles and clean code – Udemy – 2026.
- Backend Programming II: Backend Design and Architecture – CoderHouse - 2026.
- Backend Programming I: Advanced Backend Development – CoderHouse - 2025.
- Principles of Golang – Microsoft - 2025.
- JavaScript – CoderHouse - Year 2024.
- Web Development – CoderHouse - Year 2023.
- Introduction to Python – Udemy - Year 2022.

TECHNICAL SKILLS

Programming Languages: Javascript, Typescript, Python.

Frameworks: React, React Native, Zustand, Bootstrap, Electron , Node.js, Express.

Data Bases: PostgreSQL , Couch DB , PouchDB , MongoDB, SQL.

Tools: Git, Github Actions, Google Cloud Platform, Amazon Web Services, Obsidian, Notion , Docker , Arduino

Workflows (AI automation): N8N

Agile: Scrum.

LANGUAGES

- **Spanish** – Native.
- **English** - B1 (Intermediate).
